

# Sports Fields & Grounds

We know how tough it is to keep turf healthy and safe — for everyone from professional athletes to community sports teams. That's why our in-house agronomists partner with leading universities to conduct turfgrass research to improve playability; why we've partnered with every Super Bowl stadium since the inaugural game in 1966; why we've been selected to help prepare the grounds for many Olympic Games sites around the world; and why sports turf managers count on us for a complete offering of quality products — from irrigation systems and rotary mowers to utility vehicles, debris blowers and line painters.

*New Toro sports fields and grounds equipment includes:*

**Groundsmaster® 5900 Series Rotary Mowers.** All-new from the ground up, the 5900 Series delivers market-leading power, precise maneuverability, 4-wheel drive and increased operator comfort. The new 16-foot rotary mowers can mow an acre in less than 5 minutes and includes onboard InfoCenter diagnostics, a SmartCool auto-reversing radiator fan and a climate-controlled cab.

**Groundsmaster® 7200/7210 Rotary Mowers.** The Groundsmaster zero-turning radius rotary mower provides unparalleled versatility and durability, making it rugged enough to be called a Groundsmaster. The machine also can convert from mow-to-snow with the patent-pending POLAR TRAC™ system.

**Infield Pro® with attachments.** The new 3040 and 5040 models feature innovations

that elevate the overall flexibility of these sports field management machines.

The new Quick Attach System allows operators, in less than a minute, to switch from among 21 different attachments. This includes the new

Bunker Pump, which throws water up to 45 feet and pumps 95 gallons per minute.

**Pro Force™ Debris Blower.** Delivers industry-leading air power for quick removal of clippings, leaves, twigs, aeration cores and other debris. Activated from a handheld wireless controller which allows the user to start/stop the blower, adjust engine speed and rotate the nozzle 360 degrees.

**Line Painter 1200.** The Line Painter 1200 is a walk-behind line painter to line sports fields and other areas. Delivers unparalleled productivity and precision with the exclusive onboard Express Clean System.

**TORO®**

## Sports Fields & Grounds *(cont.)*

*New Toro irrigation solutions include:*

**TIS-360/480 Intelli-Sense™ Controllers.** Our newest addition to the Toro Intelli-Sense family is the 36- and 48-station commercial controller with real time ET-adjusted irrigation. Receives daily weather data from the ET Everywhere™ data service and patented WeatherTRAK® scheduling engine to automatically adjust the irrigation schedule.

**Sentinel® Water Management System.** The Sentinel System has the ability to control up to 999 field satellites from one location, giving users a water management tool that provides reliability, accuracy, and annual water savings of 25 to 30 percent. Additionally, pipeline breaks, malfunctioning valves and missing heads are automatically detected and shut down to prevent excessive

water loss. **TR Series Stainless Steel Rotors.** These rotors offer the designer or municipal account a choice of a stronger product for areas where vandalism and/or liability are primary concerns. Equipped with a durable stainless steel riser and nozzle assembly, these rotors also feature the TruJectory™ nozzle spray adjustment and X-Flow® water shutoff for the ultimate in flexibility.

**220 Brass Series Valves.** These heavy-duty brass and stainless steel valves are rugged and reliable, making them ideal for municipal and sports field applications. Includes the new Spike-Guard™ solenoid, which allows twice as many valves to run simultaneously on one transformer to help lower energy costs.
